

# Product Information Sheet

## Concrete Stain

### PRODUCT NAME

**Concrete Camouflage®  
Concrete Stain / Acid Stain**

### PRODUCT DESCRIPTION

**Concrete Camouflage** concrete acid stain is a deep penetrating stain that can be used to color old concrete, or new concrete that has cured for at least 28 days. Acid stain reacts chemically with cured concrete to provide a permanent color change within the concrete's surface that will not peel, crack, chip, or fade.

**Concrete Camouflage** acid stain gives the concrete a marbled, mottled, or natural stone appearance. Slick finished concrete tends to look more marbled, while the less slick, broom or rougher finish of the surface results in more of a stone look. As each piece of concrete is different and unique, each piece of concrete will color differently, allowing variance and beauty, giving each piece its own unique interpretation of the colors used. Transforming dull and lifeless concrete into unique pieces of art.

**Concrete Camouflage** acid stain provides an excellent custom look and is ideal for residential, commercial, or municipal applications, including but not limited to: statuary, masonry surfaces, all types of concrete slabs and floors, as well as basement floors, garage floors, driveways, entryways, masonry walls, patios, pool decks, sidewalks, and don't forget restaurants, malls, hotels, showrooms, and any other place that you find concrete.

### BENEFITS

**Concrete Camouflage** concrete stain provides a permanently colored surface that will not fade, peel, or chip.

**Concrete Camouflage** concrete stain is simple, very user friendly, and extremely low maintenance.

**Concrete Camouflage** concrete stain achieves the expensive look of luxurious flooring at a fraction of the cost.

### APPLICATION

( Before doing your entire job, we suggest trying it on a small out of the way area first. To ensure not only desired color and look, but also compatibility with your particular slab of concrete.)

Apply 1 coat of **Concrete Camouflage** concrete stain to concrete that is at least 28 days old, of uniform appearance, dry, and clean from all materials that would prevent or limit penetration and reaction. Shake well before use. **Concrete Camouflage** acid stain is designed to be used right out of the bottle with no mixing required. If you do desire to dilute the stain, use water. Use equal parts in your measurements to ensure you keep the color constant. When diluting, you may need to add very small amounts of muriatic acid to maintain the acidic strength. Apply the stain with an all plastic garden type pump up sprayer and/or an acid brush. Both can be bought at most home improvement stores, through us, or one of our retailers. If using the brush only, pour the stain in a bucket and dip the brush and apply, **but be careful!** Acid may

splash onto you and your surroundings. When using a sprayer, pour the acid into the sprayer and pump up. Spray or brush the stain on enough to saturate the concrete but not so much as to cause puddling. The acid brush can be used to even out puddles and move around the stain to ensure complete coverage along edges and overall, but the brush is not for scrubbing. The stain does not require scrubbing. Avoid excess brushing or brush marks could be left. Allow to dry completely. A residue will form which must be cleaned off with water. You can use mops, water hoses, and/or extremely soft bristle brooms to remove the residue. We recommend you clean once with water and ammonia, (mix 1 cup ammonia to 5 gallons of water) which will neutralize the stain and then final clean with water only. Control water runoff.

**Coverage** – should cover approximately 400 square ft. per gallon for slick finished concrete and 280 Square foot for rough or broom finished concrete.

### Usual Maximum Coverage:

1 Gallon = 400 Sq.Ft.

32 Ounce = 100 Sq.Ft.

8 Ounce = 25 Sq.Ft.

### MAINTENANCE

**Concrete Camouflage** stained surfaces are easy to maintain and can be cleaned by sweeping, washing with a hose and water or power washer when outdoors, and mop and water or commercial floor cleaners when indoors. To ease cleaning, add lustre, and preserve

## MAINTENANCE CONT.

the variegated appearance, as well as provide long-lasting durability, apply Concrete Camouflage CLEAR SHIELD™ Concrete Sealer. A protective sealer containing UV inhibitors.

For interior applications, let the sealer cure and apply Concrete Camouflage TOP SHIELD™ Floor Wax. An acrylic, scuff resistant finish that is both mop on style and extremely durable. For exterior applications you can add CLEAR GRIP for added traction. Reapply a fresh coat of floor wax on interior applications and a fresh coat of sealer on exterior applications as needed.

## SAFETY PRECAUTIONS

Danger! Corrosive! Harmful or fatal if swallowed. Causes eye, skin and respiratory irritation and burns. Contains diluted Muriatic Acid. Use only with adequate ventilation. Avoid breathing the vapors or mist. Avoid contact with skin or eyes. Wear goggles, rubber gloves, and protective clothing. Keep closed when not in use. Kills vegetation. Permanently stains and/or damages some metals. Caution! The water used to clean the residue will be slightly corrosive and will still have the capacity to stain, and damage, including vegetation.

**FIRST AID:** In case of **eye contact**, wash immediately with cool running water for at least 15 minutes lifting eyelids to ensure complete cleansing of the eye. Get medical attention. For **skin contact**, wash immediately with running water and remove all contaminated clothing. If **inhaled**, remove to fresh air. If **swallowed**, call a doctor or poison control center immediately. Do not induce vomiting. Give water, milk, milk of magnesia, or egg whites beaten in water.

## DRYING TIME

Concrete Camouflage concrete acid stain dries as quickly as water. Time depends on weather and humidity levels. Do not apply if surface or air temperature is below 40 degrees F

## AVAILABILITY

Available through hardware stores, builder and contractor stores, and nurseries, or contact manufacturer.

## PACKAGING

**1 Gallon** and **5 Gallon.**  
**8 Ounce** and **32 Ounce.**

## WARNING

Concrete Camouflage acid stain colors: Grey, Turquoise, Bronze Green, and Mossy Green are to be used for interior applications only. They may react to excessive sunlight and water and blacken, darken, or spot.

## IMPORTANT NOTICE

Manufacturer's and Seller's Condition of Sales:

The material is guaranteed to be of standard quality and to conform to our published specifications. Since we do not control the use and application of this product, nor the areas to which it is applied, we disclaim any and all responsibility or warranties, expressed or implied, in connection with its handling, its use and storage, or the results obtained. Likewise, we disclaim any and all responsibility or warranties, expressed or implied, in connection with any injury or damage of any nature, whatsoever, resulting from its uses. Also excluded is any warranty of merchantability.

## LIMITED WARRANTY

Camouflaged Concrete Corp. warrants its products to be of good quality and will replace any product proven defective. Satisfactory results depend not only upon quality products, but also upon many factors beyond our control. Therefore, except for such replacement, Camouflaged Concrete Corp. makes no warranty or guarantee expressed or implied, including warranties of fitness for a particular purpose or merchantability, respecting its products, and Camouflaged Concrete Corp. shall have no other liability with respect thereto, including without limitation, liability for incidental or consequential damages. Any claim regarding product defect must be received in writing within (180) days from the date of shipment. No claim will be considered without such written notice or after the specified time interval the user shall determine the suitability of the products for the intended use and assumes all risk and liability in connection therewith.
